Data Notes

Agricultural Overview

This bulletin covers 27 agricultural industries in the State of California. The number of industries ranges from five to seventeen within each of the six geographic regions. The regions are the San Joaquin Valley, South Coast, Desert, Central Coast, Sacramento Valley, and North Coast (refer to map for details).

The data are organized into the following tables by state and region:

- Wage and Salary Workers
- Average Hourly Earnings

Introduction

The California Agricultural Bulletin is produced by the Employment Development Department (EDD) in cooperation with the U.S. Department of Agriculture and through a grant from the U.S. Department of Labor. Because of changes in sampling and estimating procedures, farm employment data published by EDD prior to January 1997 may not be strictly comparable to current estimates.

Summary

Employment

California agricultural employment for April 2000 increased 54,500 jobs over the previous month, a gain of 19 percent. From March 2000 to April 2000, Total Agricultural Production registered an increase of 42,900 jobs, a gain of 25 percent. Agricultural Services registered an increase of 11,600 jobs, for a gain of 10 percent. Increases in both Agricultural Production and Agricultural Services are normal for the month of April. The change in California agricultural employment from March 1999 to April 1999 was an increase of 54,400 jobs.

For the month of April 2000, the largest change in the number of jobs occurred in Farm Labor Contractors with an increase of 9,200. Among Production Crops, Berries registered the largest increase in jobs with a gain of 7,200. The largest decrease in jobs was registered in Tree Nuts with a decline of 3,900 workers. Total agricultural employment increased in the Central Coast, South Coast, San Joaquin Valley, and Sacramento Valley regions while the Desert and North Coast regions posted decreases.

Production and Crop Activity

During the first part of the month, warm sunny conditions prevailed. However, rainfall slowed field activities in most areas during the latter part of the month. When weather permitted, cotton planting continued at a rapid rate and some growers applied granular insecticides to protect seedlings from aphids and mites. Corn was planted as fast as ground could be prepared. Growers also planted safflower, sunflowers, carrots and other summer vegetables. Tomatoes, melons, and peppers were transplanted in the San Joaquin Valley and tomato fields were treated for weeds. Weed control activities also began in corn and cotton fields. Rice growers continued to prepare fields for planting and some aerial rice seeding began. Some early wheat and oats were cut for silage. Alfalfa hay was cut and baled. Onion and garlic fields were irrigated. Leaf lettuce was picked and the harvesting of head lettuce, asparagus, spring sugar beets, and broccoli was active. Strawberry picking was active in the Central Valley. Vegetables harvested during the month included basil, carrots, cabbage, kale, cauliflower, cilantro, mushrooms, parsley, radishes, zucchini, scallop squash, snap beans, English peas, green onions, turnips, artichokes, beets, greens, okra, and radishes.

Warm, sunny weather allowed fruit and nut growers to continue planting new trees and vines. Weed control and application of fungicides to stone fruit and almond trees was active. Fruit thinning continued in early varieties of peaches, nectarines, and apricots. Growers irrigated and applied sulfur to control mildew in grape vineyards. Picking of grapefruit and lemon crops was active in southern California. Valencia oranges were harvested in the Desert Region. Navel oranges and minneola tangelos were also picked. Beehives were moved into citrus groves to pollinate new crop citrus blossoms.

Agricultural Summary Charts

DATA NOTES

Data Sources:

These data are obtained from two sources: the Employment Development Department (EDD) Covered Employment and Wages (ES-202) data files and a monthly survey conducted by the California Agricultural Statistical Service (CASS) of the U.S. Department of Agriculture (USDA) and the Labor Market Information Division of EDD of 4,200 agricultural employers. The sample was selected to be representative of the state's agricultural employers by size, geographic location, and industry categories. Sample data are gathered for the survey week that includes the 12th calendar day of the month. All data in this bulletin represent activities taking place during this mid-month period. Same month prior year employment data are benchmarked to the ES-202 data files maintained by EDD.

Data Comments:

To aid in accurate usage and interpretation of the data, please note the following:

- Agricultural Services employment survey data may be recalculated; historical trend information is used to adjust sample data when low response rates occur.
- Regional data may show greater variability than statewide data because of small sample size and variable reporting patterns in specific industries.
- Current month regional estimates are based on the recorded addresses of owner-operators. Same month prior year regional data are based on worksite locations. Significant differences between regional current month and same month prior year data could result, although statewide totals might be comparable.
- Where data cannot be estimated because of inadequate sample reporting, the letters "na" have been entered into the
 field to indicate estimates are not available.
- Wage data include wages of supervisors and hired non-production workers (primarily administrative personnel). Piece rate data are also included where applicable.
- Fishing, forestry, and hunting industry data are not included in the Agricultural Services estimates. Unique seasonal industry patterns of employment make producing employment estimates for these industries problematic.
- Employment data do not include employers of unpaid family workers.
- Agricultural workers who are employed by farm labor contractors are reported in Agricultural Services under that
 industry category. Employment levels in Crop Production and Livestock Production do not reflect their activities in the
 associated industries that contract with the farm labor contractors.

Total agricultural employment and hourly earnings estimates in this bulletin are derived from the monthly Current Employment Statistics for Agriculture project. Estimates in this bulletin will differ from other agricultural estimates published by EDD and the USDA because of differences in the number of industries covered and in the definition of agricultural workers.

Subscriptions:

Annual subscriptions are available for \$30.00 per year. Ask for publication number LAU-15. To subscribe or for information, please call (916) 262-2162 or write to:

Employment Development Department Labor Market Information Division Publications Information Unit 7000 Franklin Blvd., Building 1100 Sacramento, CA 95823
